SearchX

From Hidden to Authority: Page 1 on IT-recruitment

SearchX is a Dutch recruitment company specializing in IT, AI, Renewable, and Engineering professionals, from startups to multinationals. Founded in 2013, their philosophy is simple: recruitment is about people, not positions.
They combine data-driven marketing with genuine human connection, guided by their core values: Driven to go beyond expectations, Reliable in building long-term partnerships, and Personal in everything they do. Their mission is to challenge the status quo in staffing by creating meaningful, lasting connections that match both skills and culture.

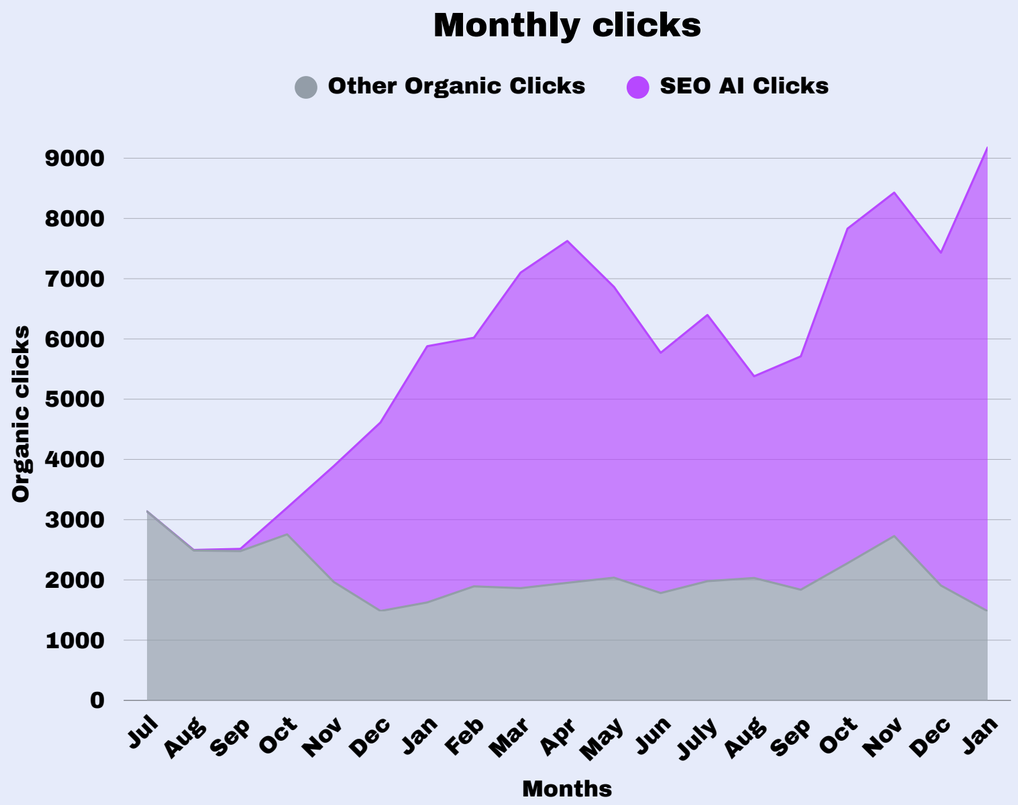
WP SEO AI clicks in Jan



"While skeptical at first, I am now certain we have found the perfect strategy to optimize our SEO, while also being well-prepared for everything that is happening in the "AI space". Knowing that we instantly rank on every LLM and still increase website traffic is super valuable to us. Not to mention the 54% increase in leads that WP SEO AI generated for us."

Malou Kroon, Marketing Manager

WP SEO AI

Case Study

Challenge - Too little time for SEO

Before our collaboration, Search X already had a complete keyword strategy with more than 600 topics. However, they lacked the time, capacity and manpower to execute it. They were curious to see if AI could incorporate their existing strategy and produce consistent, high-quality content at scale without losing their authentic tone.

WP SEO AI's - Approach

WP SEO AI imported their full keyword plan into our platform, built knowledge bases for tone and topic expertise, and automated article creation directly in WordPress.

In close collaboration with founders Ernst and Michel and marketing managers Malou and Joy, we met monthly to review results, refine clusters, and expand a recruiting keyword universe that now outranks competitors across both traditional and AI search.

WP SEO AI's - Impact

- Within 1 year, organic clicks doubled from 3,100 to 6,344, with 5,181 clicks coming directly from WP SEO AI content
- 8 of the 10 best-performing pages were created through our platform (5 outperforming the homepage)
- In year 2, Search X seamlessly shifted from candidate-focused to B2B hiring content with one click
- Within 12 months, organic clicks doubled and leads increased by 54%
