Challenge - Major traffic loss

Co-Office had recently lost about 75% of its organic traffic after key website pages were removed during a site transition.

The company wanted to recover its visibility on Google and attract new customers looking for turn-key and serviced office spaces. But they lacked the in-house time, resources, and SEO capacity to rebuild organic traffic effectively.

WP SEO AI's - Approach

We developed a data-driven topical cluster strategy focused on all questions and search intents related to renting business offices in Amsterdam. The content covered multiple perspectives of their target audience, from entrepreneurs seeking flexible spaces to corporates looking for turn-key solutions.

In the first three months, we delivered 60 SEO-optimized blogs to create a strong foundation and later continued with 40 per month to maintain consistent growth. Our tracking and testing features allowed us to analyze which articles generated traction and engagement, enabling continuous optimization.
