WP SEO AI

Roelands Boomkwekerijen

From no time for SEO to online authority in tree and hedge plants

Roelands Boomkwekerijen wanted to attract more professional B2B clients but lacked time and marketing capacity.

WP SEO AI built a product-focused content strategy around their main tree and hedge species, automating blog creation and publishing while Jelle Roelands only reviewed top-performing content.

Between May and October, clicks grew from 218 to 892, a +309% increase, positioning Roelands as an online authority in their niche without adding to their workload.

Case Study

Challenge - No time for SEO

They wanted to attract more professional B2B clients and strengthen brand authority among landscapers and municipalities, but lacked the time and internal marketing capacity to do so.

With a small team focused on production and logistics, marketing was often deprioritized. As competitors gained visibility through educational content, Roelands realized the need for a sustainable digital presence to stay competitive.

WP SEO AI's - Approach

WP SEO AI implemented a product-focused content strategy built around clusters for Roelands' main tree and hedge species. Each cluster targeted practical, search-driven questions (e.g., pruning, planting, maintenance), aligning perfectly with customer intent.

WP SEO AI managed all content creation and publishing, while Roelands only reviewed high-performing blogs flagged by Content Alerts.
This allowed the company to scale visibility efficiently without diverting resources from daily operations.

WP SEO AI's - Impact

- AI-generated content now drives steady organic traffic growth.
- Roelands' articles are featured as a cited source in Google's AI Overview (example: "Hoe ver moet je liguster terugsnoeien?").
- Between May and October, clicks grew from 218 to 892, a +309% increase.
- Marketing efforts are now time-efficient, scalable, and evidence-based.
