

Maas-De Koning Lease

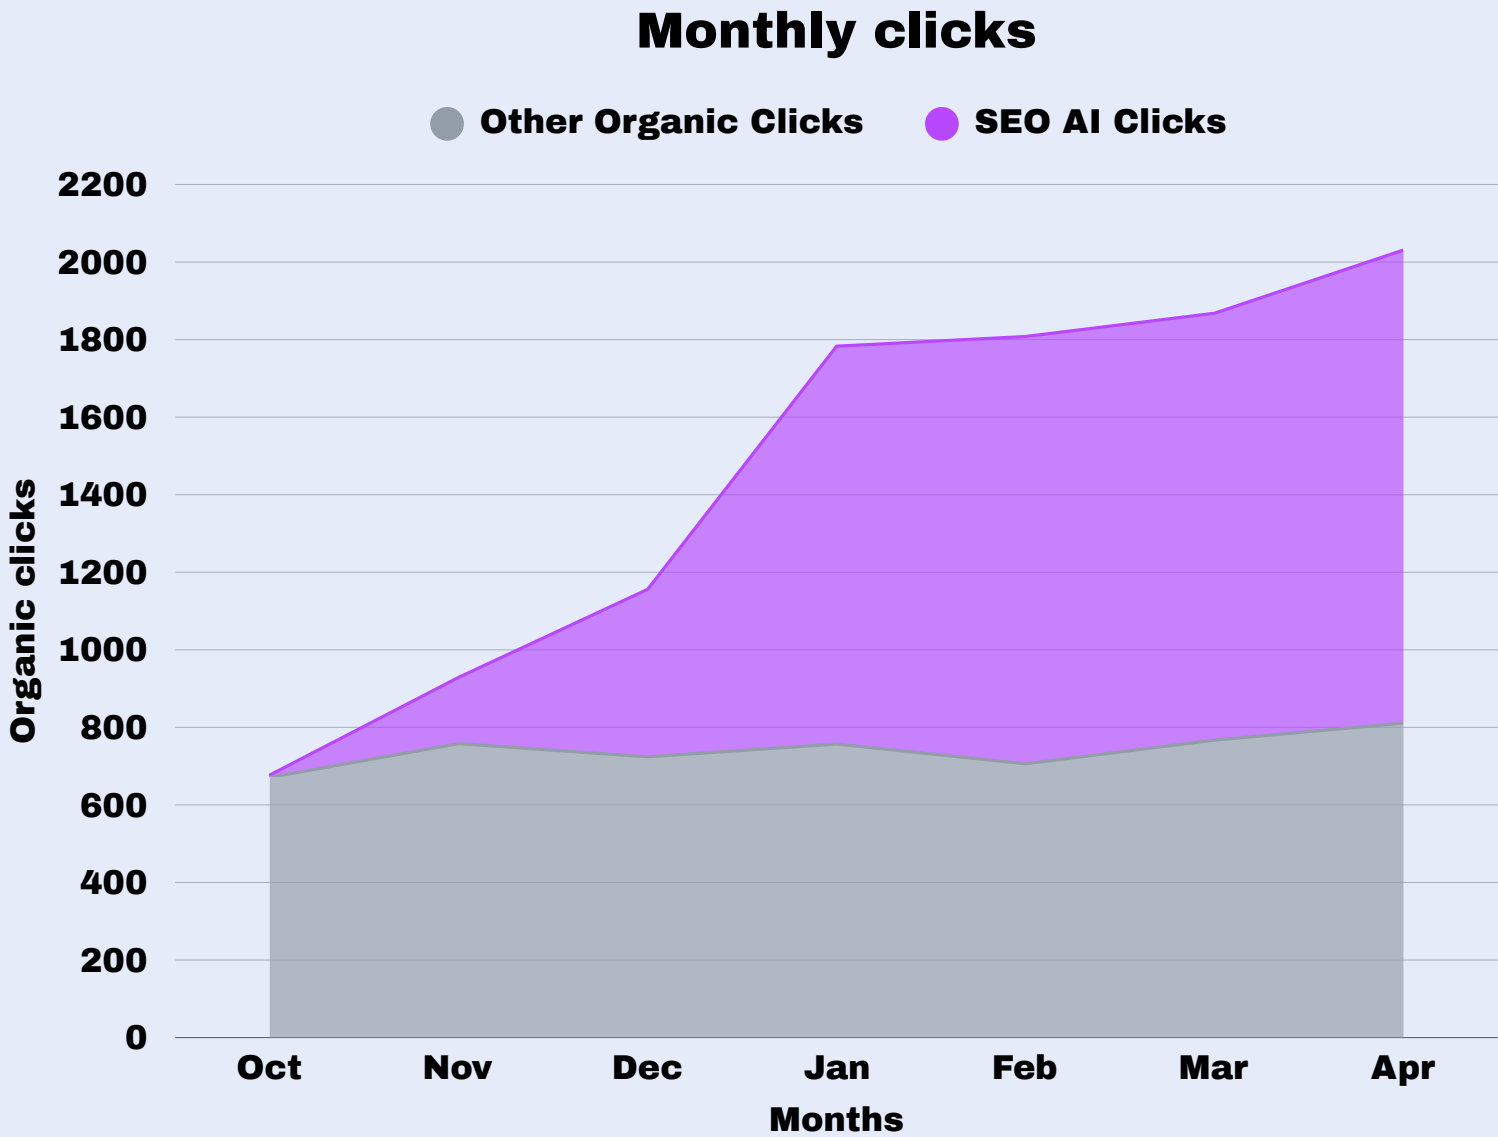

From limited SEO capacity to +200% organic clicks in 6 months

Maas-De Koning Lease wanted to grow its online visibility in a specialised B2B leasing market, where reaching the right business decision-makers through search is highly competitive.

WP SEO AI developed a phased SEO strategy focused on high-intent leasing questions first, then expanded into fast-growing topics such as EV fleet management, business subsidies and sustainable driving policies.

In six months, organic clicks grew from 670 to 2,031 per month (+200%), with WP SEO AI content generating 63.5% of all organic traffic.

Maas-De Koning Lease

Case Study

Challenge - Efficiency Gap

Maas-De Koning Lease wanted to attract more business decision-makers through organic search but struggled to gain visibility for high-intent leasing keywords.

Scaling SEO efforts in-house became increasingly time-consuming and resource-intensive.

With a lean team focused on daily operations, they needed a scalable SEO strategy that could build authority, increase relevant traffic and reduce pressure on internal resources.

WP SEO AI's - Approach

WP SEO AI implemented a phased B2B content strategy targeting practical, high-intent questions around commercial leasing, lease structures, tax implications and lease comparisons.

After building authority, the strategy expanded into emerging topics such as EV fleet management, business EV subsidies and sustainable driving policies.

WP SEO AI managed research, writing, optimisation and publishing, allowing Maas de Koning to scale SEO visibility while significantly reducing internal time investment.

WP SEO AI's - Impact

-  Over 2.2 million impressions accumulated across the engagement
-  55% AI visibility score — ranked on Google, ChatGPT & Google AI Mode
-  In six months, organic clicks grew from 641 in October to 1,921 in April, a 200% increase.
-  SEO has become scalable, efficient and measurable, with WP SEO AI content now generating 63.5% of all organic clicks.
