WP SEO AI

CK Active

From over-reliance on expensive ads to healthy organic SEO growth

CK Active, a private gym in the south of the Netherlands, previously relied almost entirely on Google Ads for website traffic.

After starting with WP SEO AI, they shifted their focus to sustainable organic growth. Through 20 AI-powered blog posts per month, structured into service topical clusters.

What began as a bold move — turning off all ads — has now become a success story of building trust, consistency, and predictable growth through content automation.

"We've been working with WP SEO AI for several months now and are very satisfied with the results. It has helped us improve our visibility and communicate more effectively with both existing and potential customers."

Koen Bakker, Owner at CK Active

WP SEO AI

Challenge - Reliance on expensive ads

CK Active relied heavily on Google Ads for traffic — but once the ads stopped, the traffic disappeared overnight.

They wanted to build a sustainable organic traffic source through SEO but lacked the internal capacity and scalable resources to execute it, despite having some in-house SEO knowledge.

WP SEO AI's - Approach

We developed a content-driven SEO strategy focused on strengthening CK Active's topical authority.

Using WP SEO AI, we produced 20 optimized blog articles per month across core content clusters representing their key service pillars.

This approach ensured consistency, scalability, and a steady growth in visibility without manual bottlenecks.

Case Study

WP SEO AI's - Impact

- Within the first few months, organic visibility and traffic grew steadily, gradually compensating for the loss of paid ad traffic.
- After the 5-month mark, the traffic exploded, going from roughly 15% click contribution to 90% click contribution from the WP SEO AI content.
- Between April and October, clicks grew from 325 to 2343, a +620% increase.
- The team now trusts the process and sees SEO as a reliable long-term growth engine, independent of ad spend.
