Case Study

Challenge - Limited Capacity to Scale for AI

Schulte Energie & Techniek had historically relied on word of mouth and had never structurally invested in SEO, resulting in limited and passive online visibility. At the same time, they wanted to actively grow organic traffic, reduce dependency on paid ads, and prepare for AI-driven search, something their existing setup could not support.

Without an in-house marketing team, producing consistent, high-quality SEO content at scale was not feasible. Schulte Energie & Techniek needed an efficient solution to build topical authority, scale content production, and create long-term, AI-ready organic visibility without increasing internal workload.

WP SEO AI's - Approach

WP SEO AI rolled out a scalable, AI-driven content strategy focused on high-intent search queries within Schulte Energie & Techniek's core topics. Publishing ~20 SEO/GEO-optimized blogs per month, each article was built using AI-powered topic research and optimization to answer real user questions, build topical authority, and align with AI-driven search behavior.

This enabled Schulte Energie & Techniek to grow organic visibility at scale without an in-house marketing team.
