Female Ventures

+60% organic click growth in 12 months with WP SEO AI

Female Ventures is a Dutch non-profit supporting women's careers through events, networking and mentorship.

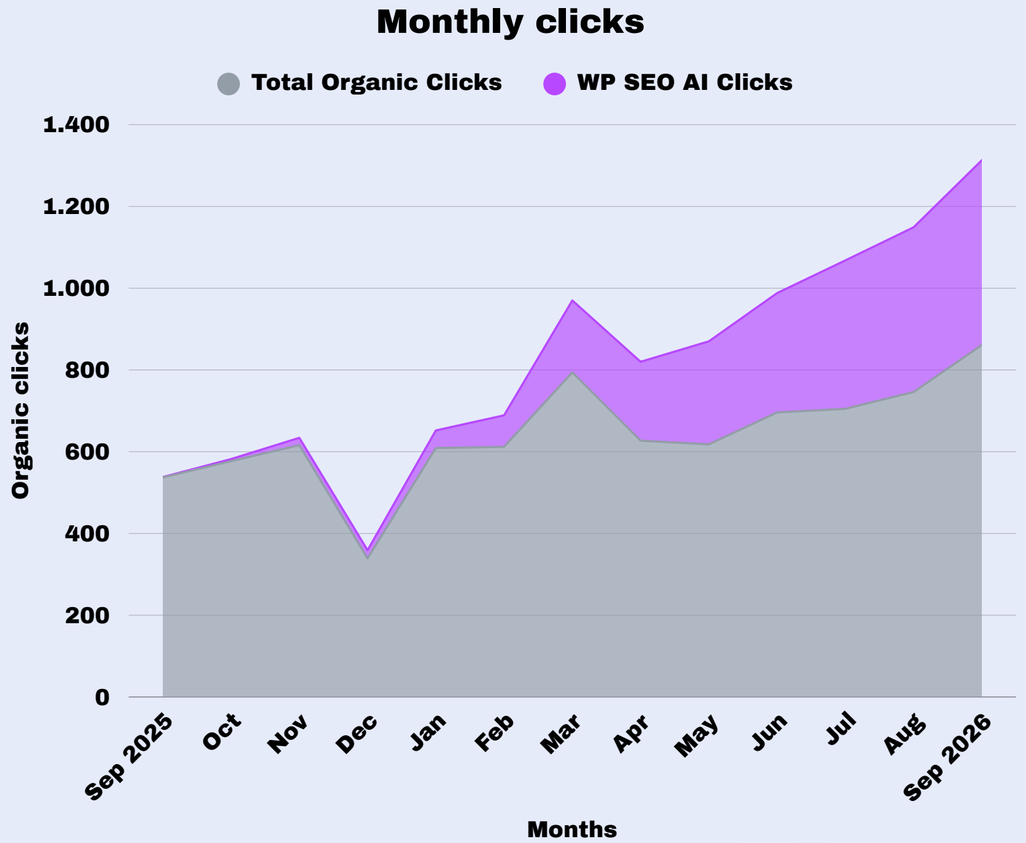

Previous SEO efforts had not delivered the visibility they needed, and the team lacked a clear plan to attract more visitors.

WP SEO AI introduced a content-driven strategy, covering two core topics each month to build authority and help women discover their community.

"Demand for our Mentorship Program has grown significantly. In 2026, we reached almost 100 matched pairs — up 52.3% from 65 in 2025, and nearly five times the 20 pairs we had in 2022." -

Priscila Antunes, Website & Digital Platform Manager at Female Ventures

WP SEO AI

Challenge - Limited Visibility

Female Ventures wanted more women to discover its events, networking opportunities and mentorship program. Previous SEO attempts had not delivered the visibility or traffic the team was looking for.

Without a clear plan for attracting visitors through search, the organisation needed a structured approach to reach women looking for career support and professional connections.

WP SEO AI's - Approach

WP SEO AI introduced a content-driven SEO strategy focused on awareness and topical authority. Each month, we worked on two major topics, steadily expanding coverage of the organisation's core areas.

Blog content now ranks for targeted searches around female mentorship, events and networking in the Netherlands, helping relevant audiences discover Female Ventures and learn about its programs.
