

WAITRO

From no SEO strategy to +316% clicks in 6 months

WAITRO, a global NGO connecting 70+ countries' research and technology organizations, wanted to scale its online presence without diverting its lean team from its core mission or flexible budget.

WP SEO AI built a content strategy from scratch, identifying high-value informational topics aligned with WAITRO's expertise in research and technology organizations, publishing 40 AI-optimized articles per month.

In just 6 months, total organic clicks grew from 499 in January to 2,076 in June (+316%), with 73% of all clicks now driven by WP SEO AI content.

“WP SEO AI provided WAITRO with a scalable content strategy that would have been difficult to build with a small team and limited resources. Instead of relying on manual content creation, we are now publishing optimized content that ranks on Google, appears in AI-generated search results, and delivers steady month-over-month growth in organic traffic. The results have exceeded expectations.”

Dominik Reinertz, Managing Director at WAITRO

Case Study

Challenge - Too little time for SEO

WAITRO is a global NGO connecting research organizations in more than 70 countries. With a lean, highly focused team, its energy has always been directed where it matters most: strengthening international collaboration and supporting innovation ecosystems worldwide.

Like many mission-driven organizations operating at this scale, WAITRO recognized the growing importance of digital visibility — but building an in-house content and SEO operation would have required significant additional headcount and internal capacity. The goal was to add a scalable content capability alongside the existing team, in a cost-efficient way that didn't pull people away from the core mission.

WP SEO AI's - Approach

WP SEO AI developed a structured content strategy for WAITRO, identifying high-value, search-intent-driven topics within the research and technology organization (RTO) space that matched what their global audience was actively searching for.

WP SEO AI handled content creation and publishing at scale, complementing WAITRO's existing work and freeing the team to stay focused on their core mission. Topics were selected to rank across both traditional Google search and Google AI Overviews, placing WAITRO as an authoritative voice on questions like "What are the leading global networks or associations for industrial and technological research organizations?" — earning top-3 rankings and AI overview citations.

WP SEO AI's - Impact

-  WP SEO AI content now drives consistent and compounding organic traffic growth for WAITRO, month after month.
-  WAITRO established itself as an authoritative voice in the RTO sector, ranking in Google AI Overviews for key research and innovation topics.
-  In just 6 months, total organic clicks grew from 499 in January to 2,076 in June, a +316% increase, with SEO AI clicks alone growing 1,536%.
-  Marketing has become scalable, efficient, and measurable, giving WAITRO a strong digital presence that continues to grow, all without adding headcount or budget.
