

Kruijdenberg Centrum voor fysiotherapie

With no internal strategy, but curiosity in AI, they realised +600% Organic Growth in 5 months

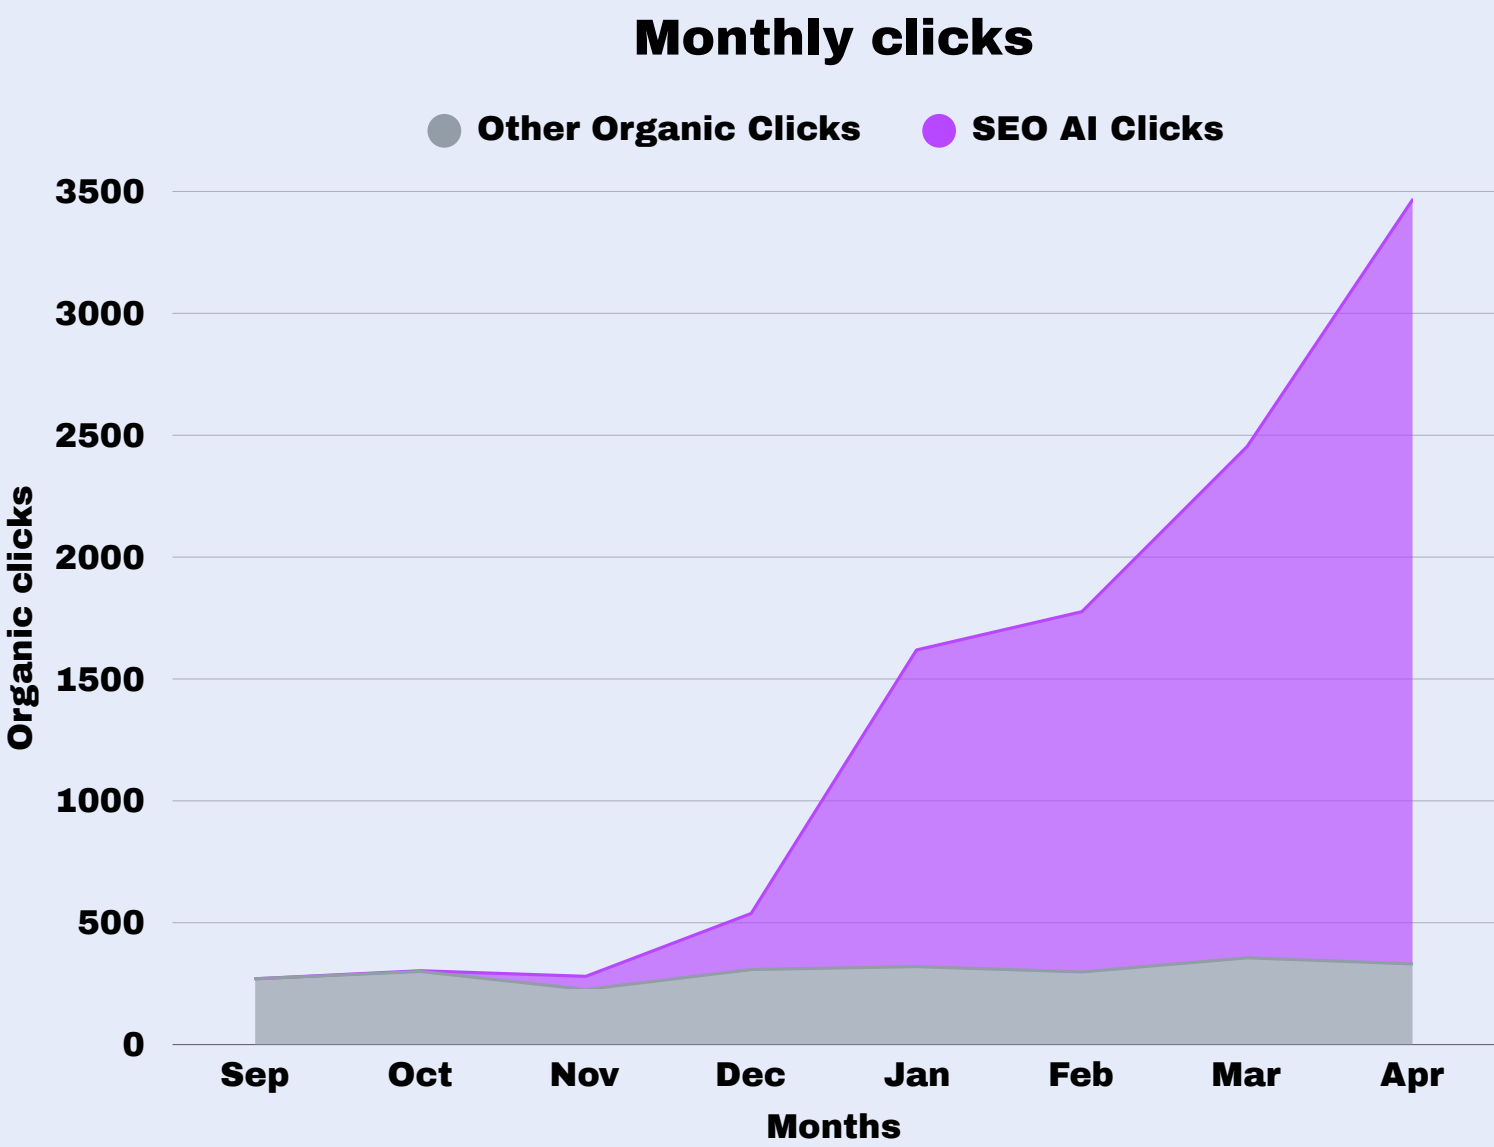

Kruijdenberg is a Dutch digital-focused company that shares in-depth expertise around movement, fitness, injuries, and recovery. The website kruijdenberg.nl is used as a knowledge platform to build authority and visibility around topics the team genuinely cares about.

In just 5 months, WP SEO AI published ~120 SEO/GEO-optimized blogs (20 per month) focused on high-intent, long-tail search queries.

- Organic traffic increased by +1,315 clicks per month in ~5 months.
- 80,2% of all clicks are now generated by SEO AI-created content.
- Kruijdenberg achieved strong visibility on non-commercial, expertise-driven topics.
- The experiment validated early investment in generative search strategies.

“What began as an experiment quickly became a conscious choice. We see more and more people, including our patients, searching for health information via AI. By sharing clear, evidence-based expertise, we aim to help them find reliable answers. That this also results in a significant increase in website visitors confirms we are on the right path.”

Kasper Kruijdenberg, Founder at Kruijdenberg

Challenge - Limited Capacity to Scale for AI

Kasper wanted to build long-term authority and organic traffic for Kruijdenberg using an SEO AI strategy. Rather than chasing short-term commercial goals, this project was set up as an experiment to understand how generative search and AI-driven content would perform.

The challenge was clear: no structured content plan, limited time, and no certainty about how AI search would evolve. At the same time, Kasper strongly believed that early adoption would be a competitive advantage. Success was defined as being highly visible on topics where Kruijdenberg truly had expertise.

WP SEO AI's - Approach

WP SEO AI implemented a content-driven authority strategy focused on two main clusters: returning to fitness and sports-related pains & injuries, starting with running and general fitness. AI was used to generate structured blog content and topic clusters based on People Also Ask data. This ensured relevance, topical depth, and alignment with emerging generative search behavior. Automation enabled consistent publishing at scale without manual research overhead.

The main goal was not volume, but topical authority and discoverability.

WP SEO AI's - Impact

-  Organic traffic increased by +1,315 clicks in 5 months (+526%)
-  Top 1–3 Google rankings exploded from 667 to 4.164 (+624%+)
-  Strong visibility in AI overviews and ChatGPT for highly relevant search intents.
-  The growth curve has been steady and continues to rise, proving the effectiveness of a structured and scalable SEO approach.

AI overview mentioning

Screenshot showing Google ranking the company high in Google AI Overviews.

This demonstrates that Google’s generative search recognizes their content as an authoritative and trustworthy source.

Hoe voelt een scheur in de rug, geef een bron

Een **scheur in de rug (bijvoorbeeld een spierscheur of verrekking)** voelt meestal anders dan gewone rugpijn. Volgens medische bronnen ervaar je dit vaak als: Kruijdenberg +1

- **Plotselinge, scherpe pijn** op het moment van het letsel, alsof er iets “knaft” of “scheurt” in de rug. Kruijdenberg
- **Hevige stekende of brandende pijn** die direct aanwezig is en kan toenemen bij bewegen, hoesten of diep ademen. Kruijdenberg
- **Spierkrampen en stijfheid**, waardoor buigen, draaien of rechtop staan moeilijk voelt. Kruijdenberg
- **Zwelling, gevoeligheid bij aanraking en soms blauwe plekken** rond de plek van de scheur. Bluerecovery.nl
- **Bewegingsbeperking** doordat de spier minder kracht kan leveren en pijn intens wordt bij normale bewegingen. Bluerecovery.nl

Dit is typisch voor een **gescheurde spier** (spierscheur) in de rug, wat meer intens voelt dan veelvoorkomende spierpijn of stijfheid. Kruijdenberg

Wil je dat ik onderscheid maak tussen verschillende soorten rugblessures (zoals spierscheur versus hernia of verstuiking)?
