Broekman

Organic Traffic Doubled in 9 Months (+103%)

Broekman & De Rode Winkel is a Dutch family-operated fashion retailer that had a strong SEO foundation, actively publishing blogs, landing pages, and FAQ content to stay visible in search and AI-driven environments.

However, creating and scaling relevant content consistently was time-consuming and difficult to maintain internally.
To solve this, WP SEO AI implemented an AI-driven content strategy, publishing around 80 SEO- and GEO-optimized blogs in 8 months.

This helped the company scale content production, target relevant search queries, and further increase their visibility in both traditional search and Google AI Overviews.

The best example for us is a blog post titled "Pants for Men with a Belly." This has now become one of our best-performing blogs. It's a topic we wouldn't have dared to write about so explicitly ourselves, but it turns out to be highly relevant to our audience.

BROEKMAN

Case Study

Challenge - High SEO Costs With Limited Impact

Broekman & De Rode Winkel faced a key challenge in consistently creating relevant, high-quality content to maintain and grow their online visibility. Developing new topic ideas, updating existing content, and writing SEO- and GEO-optimized articles required significant time and internal resources.

While general AI tools provided some support, they were still labor-intensive and did not deliver a structured, reliable SEO and GEO strategy. As GEO environments and AI search became more important, the company needed a more efficient and scalable solution to remain visible and competitive without overloading their marketing team.

WP SEO AI's - Approach

WP SEO AI rolled out a scalable, AI-driven content strategy focused on the awareness stage of BROEKMAN's audience, publishing approximately 10 fashion-focused blogs per month.

Using AI-powered topic research and optimization, each article was designed to answer real user questions, build topical authority, and align with emerging AI-driven search behavior, enabling them to grow organic visibility with a collaboration with BROEKMAN's in-house marketing team that reviewed, refined and internally linked each article.

WP SEO AI's - Impact

- Organic clicks increased from 1.708 to 3.472 in just 9 months (+103%)
- Top 1–3 Google rankings exploded from 641 to 5.019 (+683%)
- Average keyword positions moved from position 27 to position 14
- The growth curve has been steady and continues to rise, proving the effectiveness of a structured and scalable SEO approach
