Sille Gallery

How an Art Gallery Replaced Its Agency and Grew Traffic by 50%

Sille Gallery, a contemporary art gallery in Oudewater, was frustrated by a costly agency partnership that delivered declining keyword rankings and zero control over their SEO strategy.

WP SEO AI built an authority-driven content strategy around contemporary art and art-in-interior topics, publishing 140 optimized blogs in five months, entirely on autopilot.

Organic traffic grew from 1,951 to 2,939 clicks (+50.6%), with AI-powered blogs driving nearly 30% of all organic traffic, while also making Sille Gallery visible in Google AI Overviews and ChatGPT.

"I've been working with WP SEO for a few months now, and I find it very enjoyable. The contact is pleasant, personal, and professional, and they really think along with me. I feel like my website is now being seriously and purposefully optimized. I'm looking forward to significantly increasing the return on this in the long term."

Case Study

Challenge - Lack of Control Over SEO

Sille Gallery, a contemporary art gallery in Oudewater, wanted to improve its SEO strategy and strengthen its online visibility. Founder Tamara Sille faced frustration as the gallery's online visibility declined, and working with a traditional agency provided inconsistent results.

With a small team and daily gallery operations demanding attention, Tamara needed a solution to regain control over her marketing, particularly to boost visibility on AI-powered platforms like ChatGPT, while minimizing manual effort. She sought a way to restore the gallery's online presence and optimize SEO.

WP SEO AI's - Approach

During onboarding, WP SEO AI identified key topics for Sille Gallery's audience: contemporary art and art-in-interior advice. Over five months, 140 blogs were published in Dutch, focusing on authority building and "People Also Asked" strategies to boost visibility in relevant searches.

The automated publishing pipeline enabled consistent monthly output of around 28 blogs, with Tamara stepping in only to optimize high-performing content. This approach eliminated the need for an agency, improving efficiency, scale, and accuracy in SEO, while allowing Tamara to focus on her gallery and clients.

WP SEO AI's - Impact

- +50.6% organic traffic growth in just 5 months, with an increase of 988 additional monthly clicks
- Increased visibility in Google AI Overviews and ChatGPT, enhancing the gallery's presence in AI-powered search platforms.
- +38.7% increase in keyword visibility, with the gallery's keywords growing from 5,312 to 7,368.
- 29.6% of all organic traffic was driven by WP SEO AI blogs by January 2026, highlighting the value of automated content.
