

Louwman Exclusive

More than 6,300 SEO AI clicks achieved within 6 months

Louwman Exclusive wanted to increase visibility among people who dream of owning a supercar.

WP SEO AI automated blog creation around their top brands, while Louwman only reviewed the best-performing articles.

The result is a strong example of predictable SEO growth: within six months, nearly a quarter of all visitors were already coming through WP SEO AI content.

“Experts who know what they’re doing. I was a bit sceptical at first, but after a few months, the nice thing is that the added value has become very clear through the data.”

Iliass Azaghoul, Marketing Manager at Louwman Exclusive

Case Study

Challenge - Too little time for SEO

Louwman Exclusive wanted to increase visibility and build brand awareness with a clear long-term vision. The focus was not on direct sales, but on building authority among people who may only dream of owning a supercar today, but could realistically afford one in the future.

Internally, however, there was not enough capacity to roll out a consistent and scalable content strategy, which limited growth in online visibility.

WP SEO AI's - Approach

WP SEO AI developed a scalable content strategy built around strong topical clusters for Louwman's exclusive car brands. The strategy started by answering the key questions potential buyers have during the research and consideration phase.

Each blog was strategically linked to brand and model pages, helping build strong topical authority. With 40 SEO-optimised blogs per month, Louwman expanded visibility at scale in both Google and AI-driven platforms such as ChatGPT.

WP SEO AI's - Impact

-  +6,300 organic clicks in 6 months
-  66% total traffic growth within 6 months
-  21% of all traffic comes from AI-driven SEO
-  Built authority among future high-end buyers

 **From 0 to 6,300+ clicks in 6 months with a long-term SEO strategy**
