Case Study

Challenge - Too little time for SEO

Autobedrijven Verdonk, a family-owned car business in Veldhoven with over 95 years of history, wanted to grow its online visibility and attract more local customers, but had no marketing team or structured content plan in place.

With owner Bram Verdonk focused on sales and the workshop floor, marketing was constantly pushed aside. After years of trying to handle it himself, he lost motivation entirely and sought a solution that could run without his involvement, so he could invest in visibility without sacrificing time on his core business.

WP SEO AI's - Approach

WP SEO AI built a local content strategy around practical automotive topics that Verdonk's customers actively search for, such as car maintenance, buying guidance and model-specific service information relevant to their Renault, Peugeot and Citroën expertise.

WP SEO AI handled all keyword research, content creation and publishing end to end, while Bram's only involvement was an onboarding, two check-ins and eventually quarterly meetings.

This gave a one-man operation the content output of a full marketing team, without taking a single hour away from the showroom or workshop.

WP SEO AI's - Impact

- Total organic clicks grew from 270 to 1,341 (+396%), nearly 5x the starting point.
- Total keywords grew from 632 to 3,826 (+505%), top 1-3 rankings from 133 to 1,894 (+1,323%)
- Impressions surged from 16K to 127K (+658%), expanding local visibility 8x.
- In January, 79.3% of all clicks came from SEO AI content.
