"The collaboration runs smoothly and delivers the desired results so far. We're excited to continue monitoring traffic, conversions and quote requests as we scale further."

Martijn Boers, Director at Toonen Reizen

Challenge - Local visibility in AI

Toonen Reizen wanted to explore how emerging AI technology could transform their online presence, but they were uncertain about its actual impact. Without a dedicated AI-powered SEO partner, they faced a critical challenge: gaining visibility in both local (Arnhem, Gelderland, Nijmegen) and national search results for touringcar rentals. They decided to partner with WP SEO AI to test whether AI could deliver measurable business results and prove that curiosity was worth the investment.

WP SEO AI's - Approach

WP SEO AI implemented a content-driven, dual-focus SEO strategy combining local authority building with countrywide awareness-phase visibility. The approach targeted high-intent keywords around festival transportation, winter holiday bus trips, and school group rentals across the Netherlands.

AI-powered automation enabled rapid content optimization, keyword clustering, and continuous ranking improvements without overwhelming the team. The strategy focused on establishing Toonen Reizen as the trusted authority for group transportation while capturing awareness-stage searches at scale.

WP SEO AI's - Impact
