Timmerbedrijf Berendijk

From Exclusive Offline Referrals to Online Leads

Timmerbedrijf Berendijk, a carpentry business in Nijverdal, long relied on loyal B2B clients and word-of-mouth referrals.

Previous SEO attempts through an agency failed, as the process was too technical and without real results. Within two months of partnering with us, online leads started flowing in, opening the door to both B2B and B2C growth.

Case Study

Challenge - Too little time for SEO

Timmerbedrijf Berendijk struggled with growing their online visibility due to limited time and lack of SEO expertise. Previous SEO efforts through an external agency had failed to deliver tangible results, as the process was highly technical, difficult to understand, and lacked transparency.

Without clear impact or measurable growth, SEO became a frustrating and low-priority channel for the company. As a result, they were looking for a simpler, more effective approach that would deliver real traffic and visible results without requiring significant internal resources.

WP SEO AI's - Approach

WP SEO AI's strategy targeted content around window frames. In-depth, homeowner-friendly guides answering key FAQs were created, positioning Berendijk as the go-to expert.

Expert answers were published: SEO-rich, detailed content that blends practical homeowner insights with technical know-how, bridging their legacy B2B expertise into compelling B2C authority.

WP SEO AI's - Impact

- WP SEO AI content now drives consistent organic traffic growth and brings new leads for Berendijk
- Our content generated 2,970 clicks in just 10 months, growing from 0 to 621 monthly clicks
- The content now appears in Google AI Search results, significantly increasing search visibility and accelerating traffic growth
- Our strategy gained traction extremely quickly, growing from just 2 clicks to 244 monthly clicks in only 2 months (+12,100%)
