

Heeren Makelaars

From Reactive SEO to a Future-Ready Search Strategy

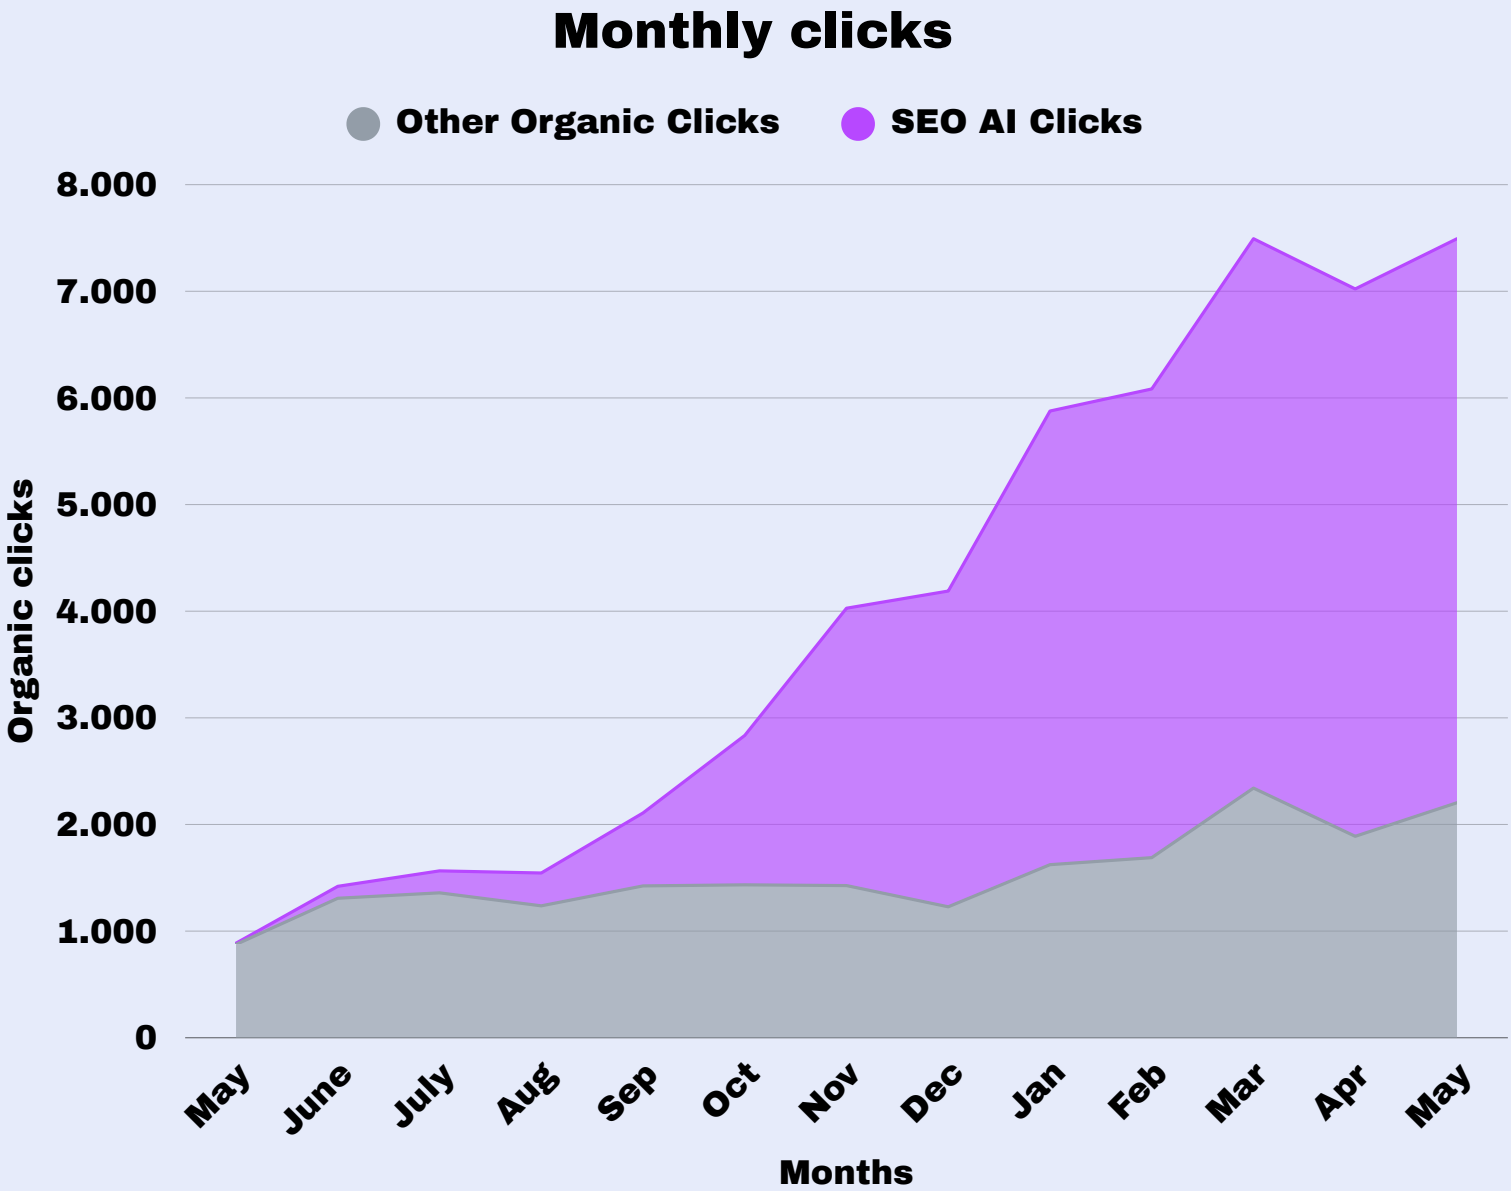

Heeren Makelaars, an Amsterdam real estate agency, wanted to build long-term visibility across both traditional Google Search and emerging AI-powered experiences like ChatGPT and Google AI Overviews.

WP SEO AI built a supporting content ecosystem around Heeren Makelaars' existing SEO strategy, publishing hundreds of long-tail articles answering real buyer and seller questions across the full customer journey. In just 10 months, monthly organic traffic grew from 1,359 to 7,439 clicks (+447%), with WP SEO AI content now driving 71% of all organic visits, giving Heeren Makelaars a future-ready digital presence in both search and AI-powered results.

“After the launch of our new website, we noticed a drop in traffic. With the help of WP SEO AI, we have risen significantly in the rankings again! We consider our experience with Christian to be pleasant. He is proactive and ensures that the content is truly tailored to our services. Excellent!”

Eran Hausel, Owner/ Founder at Heeren Makelaars

Case Study

Challenge - Generative search first movers

Heeren Makelaars is a leading real estate agency in Amsterdam, helping buyers and sellers navigate one of the Netherlands' most competitive housing markets. Their website was already being developed by a digital agency responsible for landing pages, neighborhood pages and technical SEO.

However, they needed a scalable way to answer the hundreds of questions potential buyers and sellers ask throughout their journey. Simply publishing more content wasn't the goal, building topical authority around every relevant real estate topic was.

WP SEO AI's - Approach

WP SEO AI complemented the existing SEO strategy instead of replacing it. While Heeren Makelaars' agency continued building commercial landing pages and neighborhood pages, WP SEO AI created the supporting content ecosystem around them.

The platform published 241 articles covering buying, selling, financing, neighborhoods and the Dutch housing market. Each article was strategically linked back to relevant pillar pages, strengthening internal linking and topical authority. This approach improved visibility in Google Search as well as in AI-generated answers through ChatGPT, Google AI Overviews and AI Mode.

WP SEO AI's - Impact

-  WP SEO AI content drives consistent organic growth, taking monthly clicks from 1,359 to 7,439, a 447% increase in under a year.
-  Heeren Makelaars strengthened topical authority across the Amsterdam real estate market, helping buyers and sellers find answers at every stage of their journey.
-  By May 2026, WP SEO AI content accounted for 71% of all organic traffic, generating 36,920 of the website's 56,356 total clicks.
-  Marketing has become scalable, efficient and measurable, with a content strategy built for both traditional search and the AI-powered experiences of tomorrow.
